

## Baseball Windjammer®

*Take the 'swoosh' out of booming!*

Name	P/N	EAN		Windjammer dimensions	Windjammer Weight	Packaging dims. (ext)	Weight (gross)
Baseball Windjammer	055345	5060223650715		110mm (dia.) when formed	15g	150mm (w) x 200mm (h) x 25mm (d)	30g

### Product description

The *Baseball Windjammer*® is an acoustically transparent, easy-to-apply fur solution which provides an additional layer of protection for our Baseball range of windscreens. Fitting all sizes of Baseball (which have the same external physical dimensions), this low-profile fur cover allows for high-speed, 'extreme' booming - and can even be used outdoors in light winds. A Baseball plus Baseball Windjammer combination provides up to 40dB of wind noise attenuation.

### Features at a glance:

- Additional wind-shielding performance for all existing Baseball models
- Rapid, easy attachment and removal
- Acoustically transparent, industry-leading Rycote fur technology (synthetic fur)
- Durable and easily maintained
- Incredibly lightweight – only 15g\*
- Offers even more protection to the microphone (e.g. during scene 'downtime' or equipment changes)
- One size fits all Baseball variants (19/20mm; 21/22mm and 24/25mm)
- Handmade in the UK
- In combination with the Baseball, provides up to 40dB of wind noise attenuation across the frequency spectrum
