## @ Integrate 2017

**Sydney August 2017** – Synchronised Technology is pleased to announce that we will proudly represent and showcase a wide range of beyerdynamic products in association with Ingram Micro, on the Ingram Micro Stand at Integrate 2017; Stand E26. Held at the Melbourne Convention & Exhibition Centre from the 29<sup>th</sup> till the 31<sup>st</sup> of August, 2017.

Over the course of the show beyerdynamic will be exhibiting a wide range of products including the very latest in wireless microphone systems, our acclaimed conference systems and beyerdynamic's Revoluto Array technology microphones.

Key flagship products on display:

### **WIRELESS MICROPHONE SYSTEMS: TG 500**

Reliability, flexibility and scalability are three words that describe the three NEW TG500 wireless systems; consisting of handheld, lavalier and headset systems. Each system incorporates the best of user range, battery operational life, multi-channel availability and ease-of-use. All a must for trouble free installations.

### **CONFERENCE SYSTEMS: QUINTA**

Quinta celebrates the 5th generation of our wireless conference systems. Just as every end-user application is unique, so are the multiple beyerdynamic conference control units, microphone base stations and microphone types. Whether the venue requires 6 or 600 active users, the flagship Quinta or new entry level Quinta-RS can offer a suitable solution.

### **MICROPHONE ARRAY TECHNOLOGY: REVOLUTO**

Compared to traditional gooseneck microphones Revoluto microphones creates a much greater distance for voice pick up. As a result, the speaker is not restricted to the typical pick up pattern or usual compact speaking distance offered by traditional gooseneck microphones. The speaker has maximum freedom of movement.

Visit us at the show; Stand E26, to get hands-on and discover a wide range of both conference and microphone solutions for a multitude of AV applications.

**Something that we share in common:**

You want to capture and reproduce audio at its best. For over 90 years beyerdynamic engineers have been driven by that exact same reason!
